

BUND_POLYBS01
BulkSafe Single IBC Spill Containment Bund

Most IBCs are rated to carry heavy liquids. Most bunds however range anywhere from SG1.0 – SG1.5. Over time this can be a problem with wear and tear and heavier liquid products overloading the bund. Our heavy-duty BulkSafe IBC bunds have an SG rating of 1.8 (1800kg) making them ideal for IBC spill containment.

The BulkSafe single IBC bundled pallet is compliant for storing a single 1000 Litre IBC.

- UV stable tough rotomolded poly construction for harsh climates - resistant to most chemicals
- Internal support riser providing maximum strength and load distribution
- Removable heavy duty grate for easy cleaning
- Fully compliant bund capacity of 1300 Litres
- SWL: Dynamic 1800kg & Static 3600kg
- Insert multiple units inside each other for efficient shipping
- Forklift pockets for easy relocation of bund when empty
- 3 year warranty
- IBC not included
